Forex Trading with NEXT EDGE FX

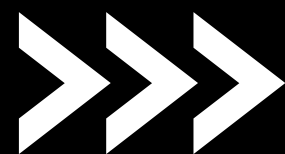

- **What Is Copy Trading**

Copy Trading is a trading method where beginners automatically copy the trades of experienced traders. Whatever the expert buys or sells is mirrored in the follower's account, making it easy for anyone to trade without deep market knowledge.

- **What Is Empty Trading**

Empty Trading refers to trading activity where no real strategy, analysis, or proper market planning is used. It often involves placing trades without direction or purpose, which increases the risk of losses. In simple terms, it is trading without a solid strategy behind it.

WHAT IS FOREX TRADING?

Forex (short for foreign exchange) trading is the act of buying and selling currencies on the global market. The goal is to profit from changes in currency exchange rates.

- Market Size: Forex is the largest financial market in the world, with trillions of dollars traded daily.
- Currency Pairs: Trades happen in pairs, like EUR/USD, GBP/USD, or DEX/USD (gold priced in USD).
- Trading Hours: Forex markets operate 24 hours a day, 5 days a week.
- Leverage: Forex allows traders to use leverage, meaning you can control a large amount of currency with a smaller investment—but this also increases risk.
- Volatility: Currency prices fluctuate due to global events, interest rates, economic data, and market sentiment.
